**Mission:**
The Florida Department of Economic Development will increase workforce outcomes and decrease costs by establishing a Performance Funding Model for regional Workforce Investment Boards and by strengthening existing data infrastructure within the state.

### Initiative Goals:
- Improve job placement for workforce customers.
- Increase wages for workforce customers.
- Continue career advancement service for workforce customers after employment is obtained.
- Decrease cost of workforce services.
- Increase general workforce knowledge and skills.
- Improve collaboration among economic development and workforce entities.

### Approach:
The Incentivizing Performance Outcomes in the Modern Workforce Environment: Designing and Implementing a Performance Funding Model for the CareerSource Florida Network project will offer incentive funding to encourage local workforce investment boards to creatively and innovatively improve service delivery. This project will be supported by an expansion of current data collection systems and the creation of an online portal for workforce data for better real-time tracking of data and sharing of information. This project will be evaluated using extensive existing data about workforce performance in addition to new data collection efforts.
